Postage Meters

SendPro™ P3000

Set a new standard for performance.

Make critical gains in productivity and efficiency.

Shipping and receiving packages and sending daily letter mail are all a necessary part of doing business. Yet, these seemingly simple tasks can be complicated processes that demand proper attention.

The SendPro P3000 simplifies the process by integrating mailing, shipping and receiving into a single system. With this integration, the P3000 provides a simpler, more streamlined way to send letter mail and large envelopes as well as ship packages using your USPS®, FedEx® and UPS® business accounts. With the receiving application, you can accurately log all of your incoming packages' information so that you have a history of every package that has been delivered to your office.

Plus, with sending costs rising and shipping becoming more complex, the SendPro P3000 can also quickly improve productivity and cost efficiency in your office.

Mail, ship and track with ease.

For letter mail, the SendPro 3000 will seal and print postage for mail up to 3/4" thick at up to 310 letters per minute.

With the Weigh-on-the-Way® feature, sorting mixed size mail is no longer necessary. The P3000 can process a stack of mixed size mail at up to 205 letters per minute applying the correct postage for each piece.

For package shipments, the P3000 allows you to review services provided by USPS, FedEx or UPS in order to pick which one is best for you. With the integrated scale and label printer, you can weigh, rate and ship right from your system. Now, you can get your packages delivered with the best cost and delivery options available.

Desktop shipping.

The SendPro™ P3000 enables users outside the mail area to ship packages from their individual PCs. Office workers simply log in to send or track a package delivery. The optional SendKit, featuring a scale and label printer, allows your office staff to weigh, rate and print professional shipping labels. No matter how many people in your office ship, equip them all with desktop capabilities that link to a central, controlled account that captures shipping history, carrier spend and package tracking details.

Manage inbound deliveries.

Automate and streamline the receipt and management of incoming packages using your P3000 and its integrated barcode scanner. The P3000 instantly logs package information, including carrier, recipient, sender, tracking number and date and time of receipt, keeping a history report of all your incoming packages so you know when each package was delivered. You also have the option to automatically alert the intended recipient with email notifications, making the entire process more accurate and efficient.

Simple user display.

The modern, color touch screen display of the P3000 enables anyone in your office to pick the ideal service and complete each job quickly and accurately. The system guides the user with its easy-to-follow menus for processing mail and shipments with each of the three carriers: USPS®, FedEx® and UPS®.

Flexible printing.

The P3000 also gives you unique control over envelope printing. From any desktop PC, you can upload your graphics to print a business logo, return address, or promotional message in full color on outbound envelopes. Print just one or print a thousand. The savings add up. Its quick changeover gives you printing flexibility and can eliminate the premiums you pay for special envelope stock.

Specifications

Max processing speed (letters per minute)	Four WOW/Non-WOW pairings: Up to 105/165 LPM, 135/220 LPM, 170/270 LPM, 205/310 LPM
