Use as directed on hard, nonporous surfaces.

Excellent surface compatibility

Using Fuzion™ eliminates the need to make tradeoffs between efficacy and surface compatibility. Fuzion™ is a pH-neutral formula that won't cause damage to common surfaces. It can be safely used on stainless steel, chrome, countertops, sinks, mattress covers, glazed tiles—even clear plastics and glass.

In outside laboratory testing, Fuzion™ left significantly less residue on a clear acrylic surface compared to a quat/alcohol and a peracetic acid/hydrogen peroxide disinfectant:

Residue Profile — Clear Acrylic

Fuzion™ enables facilities to use bleach in more places, providing strong protection against the spread of pathogens on surfaces.
