

PRESS RELEASE

January 19, 2017

Industrial and Environmental (IEC) Covers

****NEW**** - IEC is introducing a new affordable flexible cover to the AG industry. The cover is used by grain, pork and dairy producers. The cover is custom designed with a 15 year life expectancy. The World Ag Expo is the first show we are unveiling our new product.

IEC is a turn-key cover provider for anaerobic digesters and bio-gas collection systems. We also are an installer of manure pond liners and odor control covers.

Stop by our booth, #6130 if you want to keep rainwater out of your pond or tank, or want to convert your manure pond to an anaerobic digester with the ability to capture carbon credits.
