

## Industrial & Environmental Concepts (IEC) Honored at Award Ceremony for Work in Exporting Water Equipment

*June, 2015*

*Industrial and Environmental Concepts (IEC)*, was honored as a winner of the MN. Governor's International Trade Awards during an award ceremony in St. Paul. The company was selected for developing and continuing to grow a significant part of their business in foreign markets and developing innovative approaches for competing globally. IEC is a designer, manufacturer and installer of floating covers used in water treatment. IEC covers are used worldwide for applications including anaerobic bio-gas systems, odor control, heat retention and wastewater treatment for a wide range of municipal and industrial applications.

***"I congratulate these exceptional companies for their successes in international trade,"***  
**said Governor Mark Dayton.**

IEC was established in 1993 with headquarters and fabrication facility located in Lakeville, Minnesota. They have numerous projects in the Middle East, Europe, the Caribbean and throughout North America.

MN. Lt. Governor Smith with, Mike Morgan V.P. & Sean Gallant Dir. of Operations of IEC.
