Response Time Guidelines

The Tool Lending Library responds to an online tool request by email within one business day with information regarding tool availability and to request more information about the project if needed. After the Borrower confirms the loan, it takes one or more days (depending on the size of the loan) to prepare the instruments and make them available for pickup at our office. We are not able to ship items to customers due to the size of some items and because many of the instruments are sensitive and require calibration. Some instruments are limited in quantity and may have waiting lists established. Be sure to confirm availability with us before making any project commitments that require tools from the Tool Lending Library.

Borrower Responsibility and Liability

Proof of Liability Insurance—The Tool Lending Library requires Borrowers to provide documentation of commercial general liability with a minimum coverage of \$10,000.

Indemnification—The Borrower assumes full responsibility for the use of the borrowed equipment and all accessories. Borrower agrees to indemnify and defend the Marin Builders Association and its employees and agents from any claims or liabilities arising from Borrower's actions in borrowing or using the equipment from the Tool Lending Library. Borrower agrees to waive any claims against the Marin Builders Association, its employees, and agents related to Borrower's actions in borrowing or using the equipment from the Tool Lending Library.

Specific Equipment Considerations

Required Certification—Borrowers of testing equipment must provide documentation of certification (or in the process of getting certification) from one of the approved agencies [listed on our website](#). These requirements are meant to ensure that the tools borrowed from the Tool Lending Library are used in a safe and effective way.
