

Our Customers

In these renovations was the recent installation of a Chicago Tri Star Ironer/Folder and an Air Chicago Small Piece Folder from Minnesota Chemical. Installation of these large machines was a challenge given the basement location of the laundry. Under the direction of Stan Schwarz, Executive Housekeeper, the laundry now processes all linens used throughout the hotel, restaurants and banquet facilities. Stan has also instituted

many process improvements that make the busy laundry department run more efficiently and smoothly. Minnesota Chemical also provides The Commons its ECOLAB laundry and housekeeping chemicals.

With its prime location within the University of Minnesota campus and on the Green Line LRT, The Commons is the perfect location for lodging and dining when attending events at the U of M or at TFC Stadium.

Dry Cleaners:

Galvanized Hangers from Indy Hangers

These bright, shiny galvanized hangers are made in the USA and offer several unique benefits:

- Enhanced tensile strength and tight tolerances make for a stronger hanger that has a longer life and recycles better.
- INDY strut hangers have excellent adhesive on the strut making it the perfect strut for cleaners who routinely transport garments to remote locations.
- No paint means no flaking and cracking.
- Excellent for steam tunnel processing.
- Bright and clean appearance "show" the garments well, thus improving your image.
- Available in many sizes and gauges for dry cleaners and industrial laundries.

13 ga. 20" Polo Knit Hanger now available!

Something New:

Vend-Rite Introduces the all® free clear line

Vended Front Load Washer

Cutting-Edge Balance Sensing System

An updated suspension and new sensing technologies powerfully combine to redistribute loads and maintain cycle times — resulting in less utility costs, shorter wait times and increased turns through your store.

Incredible 440 G-Force

Increased spin speed exerts high G-Force to maximize moisture removal and lower drying times, getting customers in and out of your store faster and ensuring they leave satisfied.

20% Larger Capacity

Increased capacity means bigger loads, which allow for higher vend pricing. In addition, improved water and energy efficiencies lower utility bills and keep more money in your pocket.

10-Degree Tilted Control Panel

Provides ease of use for the utmost user experience.

Super-Strong Stainless Steel Tub

Built for virtually indestructible durability.

Unmatched Durability

Commercial-grade quality that will deliver reliable, efficient operation load after load. Built with premium materials and tested to meet the demands of the harshest environments, the entire machine receives Huebsch's standard three-year warranty.

*Parts only, labor not included. See Huebsch Warranty Bond for specifics.

MICRO-DISPLAY CONTROL

The Micro-Display Control features a time-remaining countdown, coin countdown and cycle status lights.

Hospitality

Milnor's laundry equipment will save your laundry valuable resources by running more efficiently, while lowering your total operating costs. Milnor's industrial washer-extractors are engineered to reduce your labor costs, save on linen replacement costs, save energy, save water, and lower your total cost of ownership.

Save Water

With RinSave® water saver reducing water consumption by up to 0.4 gallons per pound of linen washed and simple hot and cold water inlets to quickly fill the washer without fill level overshoot. Milnor washer-extractors--featuring RinSave water saver--can reduce your laundry's water usage.

Save Labor

Milnor X-Series washer-extractors with vibration isolation and low profile Divided Cylinder washer-extractors provide multiple ways to save on your labor costs and improve employee efficiency. With a proper basket design to increase the Mechanical Action Factor and clean linen the first wash, and a large open area for maximum water extraction, your staff will not spend their time on costly rewashes. High extract rates ensure shorter wash time and less dryer time.

Save on Linen Replacement Costs

On larger washer-extractors, high ribs are integral, not bolted, so there is no space for laundry to catch. Shorter process times mean less wear and tear on linen—and longer linen life.

Save Energy

A T-series washer-extractor can help to reduce your utility bills with a simple single-motor inverter drive which reaches maximum extraction speed more gradually and efficiently, reducing peak electricity amperage draw compared to multi-speed motor machines. Also, Milnor's bigger cylinder perforations provide better wash quality by promoting excellent interchange of the goods with water and chemistry; better rinsing by allowing rinse water to freely interact with the goods; and better extraction by allowing water to escape from goods easily and quickly. All components work together to ensure fewer costly rewashes and less drying time.

Tide PODS

Tide PODS deliver detergent, stain remover and brightener in one shot! The innovative multi chamber design separates ingredients until they hit the wash for outstanding cleaning power.

- * Perfect for guest and assisted living laundries.
- * Works in front and top load washers. PODS are an HE product.
- * Best to place the POD in the drum first, and then add the laundry.
- * Dissolves quickly in all water temperatures.

6-14 POD pouches per case...SPECIAL PRICE \$35.00 PER CASE
