

Eyeshadows

Red Apple Lipstick

Fave colors are Brownie Points (so versatile) & Golden Ticket (for subtle golden, shimmer). Beyond RAL being local, gluten & allergen free, I love RAL's eyeshadows for their versatility. I use the eyeshadows for eyeliner, brow liner and shadow! The application is flawless and it lasts throughout my day. You can create your own palette and they're refillable, which means environmentally friendly!

Beauty Counter Color Shade Eye Duo

Fave Combo: Pearl/Champagne. This combo is a basic MUST HAVE. I often wear these as a facial or brow highlighter.

Jane Iredale Eyeshadows

I love the extensive collection and the fact that you can get them in a 1-3 combo, in a petite compact...plus they're refillable, which means environmentally friendly!

Mascara

Red Apple Lipstick: The Lash Project

While I have used other mascaras that have provided more plumping, I absolutely LOVE the way this mascara is also repairing my lashes.

W3LL PEOPLE'S Expressionist Mascara

I love that they have so many colors to choose from! I like to get funky sometimes, with the blue hue!

Eyeliner

Red Apple Lipstick: Eyeliner in Deep Navy

I love how easy it is to create a thin or thick line with the smooth application. I find the deep blue makes my eyes look even greener and it is a fun way to still be sophisticated, with navy. I often use RAL's eyeshadows as eyeliner. I simply wet an angle brush and apply my desired thickness. I like this option because it makes it more like a liquid liner or smoky smudge, if I use less water.
