

# Stretch Film

## FLEXWRAP (Pre-Stretch)

With reinforced edges, FlexWrap prestretch film is a lightweight roll designed specifically to lower operator fatigue and provide the ultimate load security for any type of shipment. Unlike conventional hand film, FlexWrap is a rugged, highly durable blown hand film designed to withstand being dropped on the roll's edge.

Industry leading auto-gauge and extrusion control ensures its aggressive cling, puncture resistance, and load containment capabilities, allowing the film to perform well in subzero applications, as well as moving shipments within the warehouse and externally.

Available in three categories specific to your application:

### **FLEXWRAP — LITE**

Designed for A- and some B-type loads for internal moving and some external shipments.

Categorized as 30 gauge.

### **FLEXWRAP — MEDIUM**

Designed for B-type loads that may have troublesome edges in an external shipment application.

Categorized as 35 gauge.

### **FLEXWRAP — HEAVY**

Designed for your C-type loads requiring superior load retention and film memory to hold the excessive weight of the shipment.

Categorized as 40gauge.

## HANDLER

Handler by Norflex Inc. is a blown film that provides industry leading puncture and tear resistance with excellent cling to ensure film tails won't unravel and your shipments are secured. Handler film is precisely designed for the wide array of shipments that need load security during transit, even in the extreme cold environments.

Widths: 3", 5", 12", 15," 18"  
Thickness: 60ga, 70ga, 80ga

## HD HANDLER

The HD Handler has been a leader in the industry for generations in regards to its ability to retain its ultimate load retention, puncture resistance, cling, and film memory. HD Handler by Norflex Inc. is meant for the extreme applications that require critical load security and containment. Readily available, the HD Handler is produced to maintain peace of mind with cost saving advantages.

Widths: 12", 15," 18"  
Thickness: 90ga, 120ga

## LEGACY

Legacy is a highly versatile blown machine film manufactured by state of the art, industry leading technology. Its ultimate load containment is ensured by auto-gauge and extrusion control technology which increase's your film's yield, strength, and dependability in any scenario. This co-extruded, multi-layer, premium grade blown film by Norflex Inc. will provide unmatched puncture resistance, cling, film memory, and provide load security in any application.

Available in gauges of 0.60-6.00mm and widths of 10"-100" (Nominal)
