

NORFLEX

Quality Films—Fast

Hand Film

FlexWrap (Pre-Stretch)

With reinforced edges, FlexWrap prestretch film is a lightweight roll designed specifically to lower operator fatigue and provide the ultimate load security with less material. Unlike conventional hand film, FlexWrap is a rugged, highly durable blown hand film designed to withstand being dropped on the roll's edge.

FlexWrap's aggressive cling, puncture resistance, and load containment capabilities allow the film to perform well in subzero applications, as well as moving shipments within the warehouse and externally.

Available in three strength categories specific to your application:

FLEXWRAP-LITE

A and some B type loads for internal warehouse moving

FLEXWRAP-MEDIUM

B type loads with average weights in an external shipment application

FLEXWRAP-HEAVY

C type loads that require superior load retention and film memory to hold the excessive weight of the shipment

Handler (Blown Hand Film)

Handler by Norflex Inc. is a blown film that provides ultimate puncture and tear resistance with excellent cling to ensure film tails won't unravel and your shipments are secured. Handler is designed for the wide array of shipments that need load security during transit, even in the extreme cold environments.

HD Handler (Blown Hand Film)

The HD Handler has been a leader in the industry for generations in regards to its ability to retain its superior load retention, puncture resistance, cling, and film memory. HD Handler by Norflex Inc. is intended for the extreme applications that require critical load security and containment. Readily available, the HD Handler is produced to maintain peace of mind with cost saving advantages.

FLEXWRAP-LITE	14"	18"	1476'	1968'	30
FLEXWRAP-MEDIUM	14"	18"	1476'	1968'	35
FLEXWRAP-HEAVY	14"	18"	1476'	1968'	40

	WIDTH					GAUGE
HANDLER	3"	5"	12"	15"	18"	60, 70, 80
HD HANDLER	-	-	12"	15"	18"	90, 100, 120

Machine Film

Legacy (Machine Film)

Legacy is a highly versatile, blown machine providing ultimate load containment. Ensured by auto-gauge and extrusion control technology, Legacy's 250% stretch will increase your film's yield, strength, and dependability in any scenario. This co-extruded, multi-layer, premium grade film by Norflex Inc. will provide unmatched puncture resistance, cling, film memory, and provide load security in any application.

Customizable for your needs:

APPLICATIONS

- Compression film
- Converter grade film
- Fiberglass roving

JUMBO ROLLS

- Up to 100"
- 43" OD
- 3" and 6" cores

STRETCH

300% stretch capability

	WIDTH	GAUGE
LEGACY	10"-100"	60-600

AgriSeal (Silage Wrap)

AgriSeal silage wrap is a premium, co-extruded, multi-layer blown film constructed with a warranted 12-month ultra-violet protection. Introduced by Norflex Inc. in 1994 and manufactured by state of the art auto-gauge and extrusion control technology, AgriSeal will provide you the ultimate cling, puncture, abrasion, and tear resistance for any inline or individual wrapper application.

AgriSeal was pioneered to use less film and wrap more bales per roll than its competitors in any round or square bale application. This tough, durable, and consistent film eliminates breakage resulting in tighter wrapped bales and maximum uptime.

Backed by generations of industry knowledge, AgriSeal will provide a cost savings advantage with ultimate nutrient protection for any type of silage.

Customizable for your needs:

CUSTOM WIDTH

- Compression film
- Converter grade film
- Fiberglass roving

CORE OPTIONS

- Plastic (*robust and water-resistant*)
- Cardboard (*cost savings and eco-friendly*)

COLORS

White • Black • Green
Pink (*Breast Cancer Awareness*)
Various colors—just ask!

	WIDTH		THICKNESS		
AGRISEAL	20"	30"	1 mil	1.2 mil	1.5 mil
CUSTOM AGRISEAL	10"-100"		0.90-6.00 mil		

Custom Films

Shrink Bundling Film

Norflex Inc. utilizes state of the art auto-gauge and extrusion control technology to help ensure increased yield, uptime, and film uniformity on all shrink films. Customizable to exceed any L-bar sealer or high-speed over-wrap shrink tunnel system.

SECUREWRAP

- Lower seal temperature increases savings
- Tighter package for less material waste
- Ultimate shrinking with any high-speed packaging equipment

MAILWRAP

- USPS-approved poly mailer film
- Wider seal range for increased throughput
- Certified under the USPS-T-3204 test procedure

OVERWRAP

- Film Over Film
- Stiff film for greater package security
- Superior seal with lower activation temperatures

Specialty Films

Custom availability for a variety of colors, additives, and converter grade films for both stretch and shrink films. With an unmatched industry lead time to ensure your operations are maintained, Norflex's Specialty Films will satisfy your needs of protecting or identifying your product.

SHRINK FILM

- Lamination Film
- Form, Fill, Seal (FFS)
- Mulch Film
- Vented Film
- Industrial Sheeting

STRETCH FILM

- Compression film
- Converter grade film
- Fiberglass roving

Premium-Grade Additives

VCI

For anti-corrosion applications

UVI

A powerful 12-month UV inhibitor for outdoor storage

ANTI-STATIC

Protection for static and combustion sensitive applications

COLORS

Complete line of custom colors

Norflex's trained application specialists offer years of experience that will help you optimize your film and packaging processes to reduce costs and material waste.

Standard materials: LDPE, LLDPE, HDPE, EVA, and custom formulations

About Norflex, Inc.

With unrivaled industry experience, Norflex Inc. ignited in 1994 and currently supplies some industry leaders in a variety of industrial and custom stretch and shrink film applications. Norflex Inc. is constantly evolving and consistently innovating our technology and in-house employee training in order to maintain our distinct advantage in the custom stretch, shrink, color, and converter grade film markets.

Company History

Norflex Inc., located in Western Wisconsin--America's Heartland, was founded by Arne Anderson in 1994 due to the increasing demands for custom polyethylene films. Recognizing this growth, Arne took his knowledge from his previous start-up company, Up North Plastics, and began the journey with Norflex Inc. As the market grew, Arne adjusted his business model in the late 1990's and started researching and implementing technology in order to satisfy a variety of markets with a more efficient, consistent, and cost effective blown film. After establishing the Norflex Inc. brand, more technology reinvestments in the early 2000's took place which allowed Norflex to introduce their industry leading line of high performance shrink bundling films, postal approved poly mailer films, converter grade films, custom sheeting, and a wide variety of colors and additives.

At Norflex, our commitment as a family owed company is providing our customers with ***Expertise to Deliver-Quality Films Fast***. Every day we strive to innovate and produce films that increase our customers' throughput, yield, and film efficiencies with market winning lead times. By always staying focused on ***Constant Improvement, Dependability, Honesty*** and ***Integrity***, being ***Human***, and having the ***Expertise*** to deliver, Norflex is able to supply a cost advantage solution to any of your stretch or shrink film needs.

Norflex Inc. is a plastics manufacturer specializing in quality films used for industrial, agricultural, and packaging applications.
