*Expertise to Deliver
Quality Films Fast*

Hand Film

[FLEXWRAP LOGO]

With reinforced edges, FlexWrap prestretch film is a lightweight roll designed specifically to lower operator fatigue and provide the ultimate load security with less material. Unlike conventional hand film, FlexWrap is a rugged, highly durable blown hand film designed to withstand being dropped on the roll's edge.

FlexWrap's aggressive cling, puncture resistance, and load containment capabilities allow the film to perform well in subzero applications, as well as moving shipments within the warehouse and externally.

Available in three strength categories specific to your application:

FLEXWRAP-LITE

A and some B type loads for internal warehouse moving

FLEXWRAP-MEDIUM

B type loads with average weights in an external shipment application

FLEXWRAP-HEAVY

C type loads that require superior load retention and film memory to hold the excessive weight of the shipment

	WIDTH		LENGTH		GAUGE
FLEXWRAP-LITE	14"	18"	1476'	1968'	30
FLEXWRAP-MEDIUM	14"	18"	1476'	1968'	35
FLEXWRAP-HEAVY	14"	18"	1476'	1968'	40

[HANDLER LOGO]

Handler by Norflex is a blown film that provides ultimate puncture and tear resistance with excellent cling to ensure film tails won't unravel and your shipments are secured. Handler is designed for the wide array of shipments, even in sub-zero temperatures.

[HD HANDLER LOGO]

The HD Handler, a leader in the industry for generations, is superior in load retention, puncture resistance, cling, and film memory. HD Handler by Norflex Inc. is intended for the extreme applications that require critical load security and containment. Readily available, the HD Handler is produced to maintain peace of for demanding applications.

	WIDTH					GAUGE
HANDLER	3"	5"	12"	15"	18"	60. 70. 80
HD HANDLER	-	-	12"	15"	18"	90, 100, 120

Machine Film

[LEGACY LOGO]

Legacy is a highly versatile, industrial blown machine providing ultimate load containment. Ensured by auto-gauge and extrusion control technology, Legacy's 250% stretch will increase your film's yield, strength, and dependability in any scenario. This co-extruded, multi-layer, premium grade film by Norflex Inc. will provide unmatched puncture resistance, cling, film memory, and load security in any application.

	WIDTH	GAUGE
LEGACY	10"-100"	60-600

[AGRISEAL LOGO]

AgriSeal silage wrap is a premium, co-extruded, multi-layer blown film constructed with a warranted 12-month ultra-violet protection. Introduced by Norflex Inc. in 1994 and manufactured by state of the art auto-gauge and extrusion control technology, AgriSeal will provide you the ultimate cling, puncture, abrasion, and tear resistance for any inline or individual wrapper application.

This tough, durable, and consistent film eliminates breakage resulting in tighter wrapped bales and maximum uptime for any square or round bale application.

Customizable for your needs:

CUSTOM WIDTH

- Compression film
- Converter grade film
- Fiberglass roving

CORE OPTIONS

- Plastic (*robust and water-resistant*)
- Cardboard (*cost savings and eco-friendly*)

COLORS

White • Black • Green
 Pink (*Breast Cancer Awareness*)
 Various colors—just ask!

	WIDTH		THICKNESS		
AGRISEAL	20"	30"	1 mil	1.2 mil	1.5 mil
CUSTOM AGRISEAL	10"-100"		0.90-6.00 mil		

Custom Films

Shrink Bundling Film

Norflex utilizes state of the art auto-gauge and extrusion control technology to help ensure increased yield, uptime, and film uniformity on all shrink films. Customizable to exceed any L-bar sealer or high-speed over-wrap shrink tunnel system.

SECUREWRAP

- Lower seal temperature increases savings
- Tighter package for less material waste
- Ultimate shrinking with any high-speed packaging equipment

MAILWRAP

- USPS-approved poly mailer film
- Wider seal range for increased throughput
- Certified under the USPS-T-3204 test procedure

OVERWRAP / FILM OVER FILM

- Stiff film for greater package security
- Superior seal with lower activation temperatures

Specialty Films

Custom availability for a variety of colors, additives, and converter grade films. With an unmatched industry lead time to ensure your operations are maintained, Norflex's Specialty Films will satisfy your needs of protecting or identifying your product.

- Lamination Film
- Form, Fill, Seal (FFS)
- Mulch Film
- Vented Film
- Industrial Sheeting
- Compression Film
- Converter grade film
- Fiberglass Roving
- Roll Wrap
- Custom 300% Stretch Film

Premium-Grade Additives

VCI

For anti-corrosion applications

UVI

A powerful 12-month UV inhibitor for outdoor storage

ANTI-STATIC

Protection for static and combustion-sensitive applications

COLORS

Complete line of custom colors

Norflex's trained application specialists offer years of experience that will help you optimize your film and packaging processes to reduce costs and material waste.

Manufacturing Capabilities

- Co-extruded film
- Width: 3"-100"
- 0.60-6.00 mil
- In-line slitting
- Venting
- Pre-stretch
- Jumbo rolls: Up to 100", 43" OD, 3" and 6" cores
- Standard materials: LDPE, LLDPE, HDPE, EVA, and custom formulations

About Norflex, Inc.

Norflex, Inc., is a plastics manufacturer specializing in quality films used for industrial, agricultural, and packaging applications. Norflex invests heavily in technology and in-house employee training in order to maintain our distinct advantage in the custom polyethylene stretch, shrink, color, and converter grade film markets.

Since 1994, Norflex's commitment as a family-owned company is providing our customers with ***Expertise to Deliver Quality Films Fast***. Every day we strive to innovate and produce films that increase our customers' throughput, yield, and film efficiencies with market-winning lead times. By always staying focused on ***Constant Improvement, Dependability, Honesty*** and ***Integrity***, being ***Human***, and having the ***Expertise*** to deliver, Norflex is able to supply a cost-advantage solution to any of your stretch or shrink film needs.
