55-0135 Trim and Tilt Model 135

With a motor rating of up to 135 HP or 350 lbs., virtually any trim and tilt need can be met by installing the Model 135 on your transom.

A rugged 12 volt powered actuator moves the motor plate up and down, allowing the user to easily position the motor with the remote control tethered to a 12 foot cable.

Made of 713 cast aluminum and protected with durable black powder coat, the 135 has an overall weight of 31 lbs.

To provide adequate support for your Panther bracket, the Transom side of the bracket must be 100% covered by the boat's transom.

Motor Plate Dimension

Height 11 inches
[27.94 cm]

Width 14 1/4 inches
[31.2 cm]
