Universal Lift Gauge

This unit will fit all the Panther trim and tilts, providing an accurate indication of the trim and tilt that is occurring. Know at a glance what position your motor is in.

The gauge has a 2" diameter [5.08 cm] which is the industry standard, allowing easy installation on virtually any console.

Will also work with many other lifts and plates.

The sensor is easy to install and is 5.250" high [13.34 cm].

Gauge display requires 2.0" [5.08 cm] hole.

Includes all mounting hardware and wiring.
