55-2400

Auxiliary Motor Steering Kit - Zinc

An auxiliary motor steering kit is the ideal way to provide remote control steering for kicker motors up to 25 horse-power. Steer your kicker motor from the helm along with your big motor.

The model 55-2400 is constructed of Zinc plate steel. It has a clamp that fits over the big motor's steering rod and a ball stud and "quick disconnect" that attaches to your kicker motor. Rod is 24" long (threaded to 16") so you can customize your installation. Rod size: 3/8"-24 fine thread.

INSTALLED PICTURE

Rod comes as a straight rod, depending on your configuration you may have to bend the rod in a manner similar to what is shown in the picture

Rod can be ben
