Auxiliary Motor Steering Kit - Stainless Steel

An auxiliary motor steering kit is the ideal way to provide remote control steering for kicker motors up to 25 horse-power. Steer your kicker motor from the helm along with your big motor. Constructed of stainless steel, it is easy to link your motors together—our exclusive “quick connectors” allows the connector rod to be attached or detached to each motor in seconds.

The connector rod is 24" long (threaded to 16") so you can customize your installation.

Rod size: 3/8"-24 fine thread.

INSTALLED PICTURE

Rod comes as a straight rod, depending on your configuration you may have to bend the rod in a manner similar to what is shown in the picture
