55-0101A Electro Steer Saltwater Model 101A

Trolling made easy....Steer up to a 25HP kicker from anywhere in the boat.

The Panther 101A Electro Steer is easy to install anywhere in the transom area. It operates the motor with the push of a button.

The Electro Steer will move from full right to left in only 4 seconds, with fast, precision kicker control, necessary for contour trolling.

The connecting rod between the Steer and the kicker easily disconnects, allowing versatile applications. 24 ft cable to a hand held push button switch.

Operates on 12 volt @ 5 to 7.6 amps

Made of aluminum, black anodized includes relay control and harness,

Left/right remote push button wired remote, "Z" shaped bent stainless steel rod, stainless steel ball stud assemblies and stainless steel quick disconnects.

Complete with all instructions and operators manual.

Overall dimensions 12" x 6" x 2 1/2". Wgt 9 lbs

Option: Wireless remote 55-0105
