4" Set-back Plate Model 240

An innovative flared shape allows this four inch set-back bracket more transom contact area to reduce stress and improve the motor's stability. The two piece, 1/2" thick, T-6 heat treated black anodized aluminum bracket will work with even the most powerful main engines.

This is an inexpensive solution to lagging performance.

Standard BIA bolt pattern with multiple mounting locations.

Support weight: 200 HP

Over all dimensions 14" x 5" x 4". Wgt 16 lbs.

This bracket can be installed on the transom or another jack plate.
