

Autodesk

[Autodesk](#) helps people imagine, design and create a better world. Everyone—from design professionals, engineers and architects to digital artists, students and hobbyists—uses Autodesk software to unlock their creativity and solve important challenges.

We have more than 12 million users of our professional products; more than 200 million users of our consumer apps such as [SketchBook](#) and the [123D family of products](#); as well as more than 680 million students and educators from over 800,000 secondary schools worldwide who take advantage of free access to Autodesk software and cloud services through the [Autodesk Academic Resource Center](#).

We have also powered winners of the Academy Award® for Best Visual Effects in Film with Autodesk solutions and have been included on FORTUNE magazine's Best Companies to Work For lists.

We were founded in San Rafael over three decades ago and established the [Autodesk Foundation](#) in March 2014. This concerted effort allows us to support impact design in many ways: our employee's impact, organizations using design to solve some of our world's epic challenges and providing disaster response resources. Organizations we've supported so far are [D-Rev](#), [MASS Design Group](#), [KickStart International](#), [Auburn University](#), [Gearbox](#), [Proximity Design](#) and [Build Change](#). Some benefits our North Bay employees enjoy are sabbaticals every four years, the ability to bring their dog into the office and using the Club 111 fitness center.
