

Ed McLean

9. How will you involve the local health system in the planning of supportive living facilities development going forward?

There will need to be discussions with the developer to ensure adequate healthcare is provided.

10. What systems are in place to address growing crime?

New RCMP officers and Peace officers are being hired as well as support staff who are able to do a lot of the paper work. This frees up the officers to spend more time out in the community.

11. How will you improve access to the Food Bank and other essential services for our vulnerable citizens?

Not sure which type of "access" is meant, but I know the Food Bank is very busy and I am not sure that more access by way of hours will work. Or is access not available due to the screening process? But if access is not possible because of a lack of transportation, then possibly a volunteer driver program through local churches or FCSS might be an option.
