Beautiful lake homes, ever wonder...
where is their SEPTIC SYSTEM??

Dear Kari,

Steinbrecher Companies, Inc (SCI) can do this without ugly septic areas!! We can install advanced septic systems that require much less space. Steinbrecher Companies is Minnesota's representative

of AdvanTex product (manufactured by Orenco). We have been working with these products for years.

The AdvanTex product serves properties unable to operate with conventional gravity or mound systems. We have found Orenco's AdvanTex Treatment Systems are an excellent pretreatment for type 4 systems that have or are:

- Small sites (Such as lake homes), where the water table is high and a mound would be large, tall and unattractive
- Failing systems
- Poor soils/lowlands
- High nitrogen levels
- Environmentally sensitive sites
- Pretreatment of moderately high-strength waste, such as medical facilities or nursing homes.

By pre-treating the waste water in tanks, usually a smaller drain field area is required . The finished product will be beautifully worked into your landscaping. Not only will it require much less space, but you don't have to look at an unsightly mound in your yard. (You can even custom order the lids to match your landscaping!)

These advanced systems are then monitored 24/7. We can provide this service as well. We are notified if an alarm is going off, or something isn't working the way it should. Again, this is also ideal for lake homes, since many of them are not lived in year round.

Come see us & get a FREE Snocone Aug 14th!!

At "Party in the Park" - hosted by Keller Williams

Location: Lake Orono Park, Elk River
Date: August 14, 2013 **Time:** 4:00 PM - 8:00 PM
