

Every now and then, you discover a hidden gem or best-kept secret in our neighborhood.

**Alki Dental** is just that.

For over 16 years, **Alki Dental** has served the West Seattle community with outstanding dental care from their waterfront office overlooking Elliott Bay and downtown Seattle. They have earned a reputation of caring for all patients as well as for providing a safe and relaxing experience for patients who fear dental visits.

Their staff is legendary. They are seasoned professionals who are truly concerned about the well-being of their patients. Under the new ownership of **Dr. Hanbit Chi** (pronounced “chee”), **Alki Dental** is the only dental practice in West Seattle that offers:

- A dental-health approach focused on your total well-being: body, mind and spirit
- A variety of sedation-dentistry techniques (including IV Sedation) to help patients manage pain and stress
- Panoramic and 3D digital imaging to enhance treatment diagnoses, providing patients with a clear picture of their oral health
- A spectacular view of downtown Seattle from every patient chair
- An office environment that feels like home rather than a medical institution
- **Alki Dental Club**, a patient-membership program designed exclusively for patients who do not have dental insurance and who want a simpler way to manage the cost of their oral health. No dental insurance? Join the Club! Modeled after “concierge” medical practices, the **Alki Dental Club** is like a gym membership. It offers patients a predictable way to obtain prompt, high-quality, cost-effective dental care. **Alki Dental** strengthens their patient/care-giver relationships and removes costs that add little or no value to dental health by removing third-party insurance companies from all decision-making.

Contact Alki Dental for a FREE dental consultation with Dr. Chi or for a conversation with Berry Zimmerman to discuss how the Alki Dental Club can enrich employee health benefits at your place of work.
