"Yoga is almost like music in a way - there's no end to it." Sting

Dear Yogis,

The excitement is building as we are expanding! WYC is adding more space on the fourth floor at 4000 Albemarle. What does this mean? More workshops. Series of classes that help you to delve deeper into your yoga practice. More kids classes to be added. Pilates. Through it all, we are staying calm and full of energy through yoga and deep breaths!

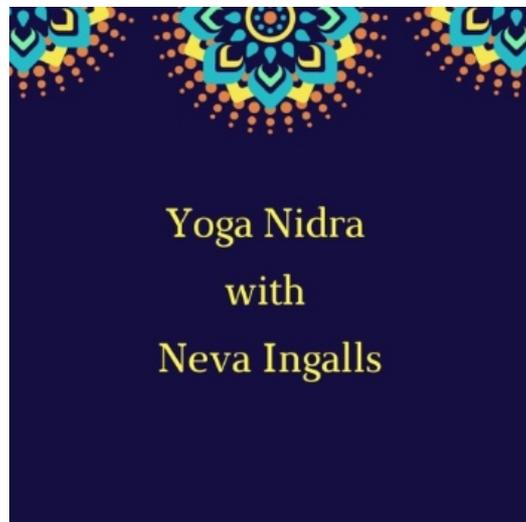

Deep breaths like the ones **David Ingalls** teaches in his ***Svastha Vinyoga*** class. David is offering a 4 week session starting April 16th in the fourth floor studio. Be one of the first to practice in the new studio. Read more about this practice [online](#), but be sure to try it to really experience the benefits.

LOTS of adult workshops and kids workshops have been added - for newborns to crawlers to age 10! More workshops and classes are in the works!

So much more to come that couldn't be added before we went to press, so please be sure to check [online](#).

See you at the studio!

Yoga for Back Pain with Denese Cavanaugh

**The IPATH Method
with Denese Cavanaugh**

**Sun, May 21, 2017
1:00 pm - 3:00 pm**

\$55 per person

As our posture deteriorates, joint movements become restricted and the differences between tense and weak muscles places greater stress on the joints. This causes pain, stiffness and loss of motion throughout the body. But fix these imbalances, along

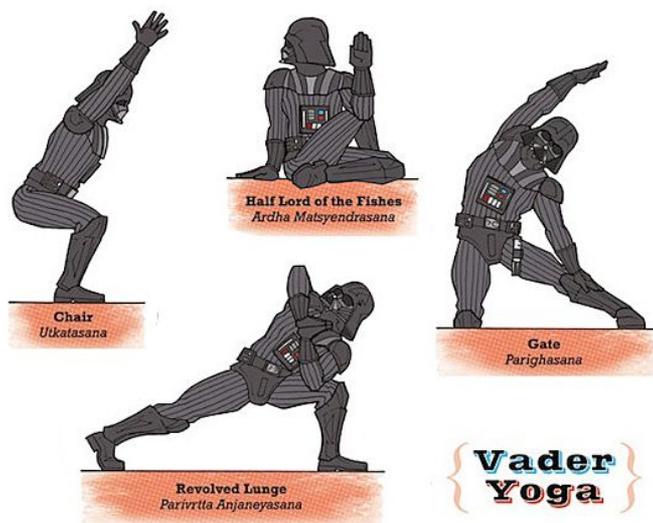

with breathing techniques, your posture (and the pain associated with it) will improve.

Denese Cavanaugh, developed this passive, yet deep alignment along with myofascial tension release session based on her knowledge of Yin Yoga poses that lubricate the bones, joints and connective tissues of the body, along with her yoga background of how to stimulate the meridian housed within, that invite deep relaxation.

Postural Alignment Technique sessions involve a series of positions using resistance balls to release and lengthen tight muscles and free up connective tissue. *Through regular practice, participants can increase their flexibility and range of motion, improve their posture, optimize and decrease pain caused by tissue restrictions.*

Did you know?

"Many of the postures in yoga gently strengthen the muscles in the back, as well as the abdominal muscles. Back and abdominal muscles are essential components of the muscular network of the spine, helping the body maintain proper upright posture and movement.

When these muscles are well conditioned, back pain can be greatly reduced or avoided."
